WORK EXPERIENCE

Junior Tools Programmer, Divinity

Larian Studios

May 2025 – current Quebec City, QC

- Custom tools development on in-house editor software for game development of Divinity, specializing in architectural & audiovisual feature groups
- Developed application programming interfaces for editor functions such as terrain interactions for automated testing toolkit
- Performed editor build-time and load-time performance profiling and optimizations
- Created parsers and databases for reference cache system of custom in-house file types and schemas
- Built a wide range of smaller features and fixed bugs across the entire editor including backend, frontend, and UI for audiovisual and narrative systems in areas adjacent to engine, gameplay, graphics, tech art, tech animation, tech audio, and dev-ops, in direct communication with stakeholders such as scripters, artists, animators, designers, and QA

C# C++ C++/CLI .NET WPF WinForms Perforce Python SQL Superluminal

Tools Programming Intern, Baldur's Gate 3

Larian Studios

May 2024 – Aug 2024 Quebec City, QC

- Custom tools development on in-house editor software for game development & production of Baldur's Gate 3
- Introduced new features such as a new interaction mode in the scene window, performed refactors, and patched bugs for both the regular (internal) and modding (community) in-house game editor
- Communicated and collaborated directly with scripters, artists, animators, designers, and QA across studios internationally

C# C++ C++/CLI .NET WPF WinForms Perforce

Programming Intern, Worms Across Worlds

Behaviour Interactive

Sept 2023 – Dec 2023 Montreal, QC

- Programmed on a medium-sized game development team, collaborating and communicating directly with artists and designers
- Implemented key features in animation and gameplay system in the early stages of a game development project

C# Unity .NET Rider Perforce Jenkins Jira

Innovation Developer Intern / Data Engineer Intern

RBC Royal Bank of Canada

Jul – Aug 2019, 2020, & 2021 Toronto, ON

React Express Node.js TypeScript Java Maven Git Angular Spring SQL Hadoop Python SQL Jenkins

INDEPENDENT WORK

Creative Director, Sleep Herd

Lamp Katze Studio

Feb 2024 - *ongoing* sleepherd.com

- Designing and developing code infrastructure for indie game, owning feature implementations, refactors, bug fixes, etc. including gameplay, AI, & physics
- Leading team of 7-12 developers. Creating roadmaps and setting milestones
- Performing dev-ops and tools programming to support artists, designers, and programmers
- Contributing to design, writing scripts & storyboards, composing music, filling in for artists on UI, concept art, animation
- Managing source control, conducting code review, creating documentation
- Doing recruitment, marketing, and production

C# Unity Git Blender

PROJECTS & GAMES

Bad Apple!! Demoscene

>6 million views, >800 stars

Mar 2021 – ongoing junferno.com/demos

I participate in the open internet demoscene of "Bad Apple!!" in which a b/w music video is programmatically played on as many different platforms as possible creatively. My demos include a pseudo-AI that uses heuristics to play on officially valid Scrabble, a mathematical description to play on a Turing machine, and a image-to-LaTeX-vector tool to play on Desmos graphing calculator

YVYR

Parody dating sim racing game

Jul – Aug 2025 junferno.itch.io/yvyr

Programming, design, writing, and music

EDUCATION

McGill University

BS in Computer Science

2020 – 2025 Montreal, QC

CGPA: 3.8/4.0

- Advanced courses in Graphics, Animation, AI
- Game Dev McGill VP 2022-2024
- Research project on Audio2Animation AI 2023
- Ubisoft Game Lab 2024, 2 nominations
- Exchanged at Waseda University 2024-2025, Member of Waseda Computer Entertainment

HUMAN LANGUAGES

Native English & Mandarin
Intermediate Japanese, Beginner French
